

AV LINUX ISO Image - End User Licensing Information

Licensing Information:

The AV Linux ISO Image is a unique and independent 'presentation media' which bundles software content covered by various licenses. The AV Linux ISO Image is offered free of financial cost and is not a commercial product itself. The AV Linux ISO Image is not a 'Distribution' of Linux it is a customized self-contained ISO Image derived from the Debian/GNU Linux Stable 6.0 (Squeeze) Distribution with some unique performance enhancements, custom packaging and ease-of-use modifications. Any content within the AV Linux ISO Image derived from Debian/GNU Linux inherits the same GNU GPL (General Public License(s) used by Debian/GNU Linux. Any unique software applications, content, system tweaks, enhancements or modifications provided by the developer(s) of the AV Linux ISO Image are also licensed under the GPL.

In addition to GPL content the AV Linux ISO Image contains bundled 'non-free' commercial software demo packages each covered by their own individual non-free licenses and each provided with their respective developers permissions for use within the AV Linux ISO Image for demonstration purposes. As-provided the AV Linux ISO Image cannot be re-distributed unless these distinct non-free commercial software demos are removed using the included 'Synaptic' software package management utility.

The pertinent non-free software packages are named as follows: **linuxdsp-jack-demos**, **linuxdsp-lv2-demos**, **linuxdsp-linuxvst-demos**, **linuxdsp-guitarfx-demos**, **loomer-linuxvst-demos**, **loomer-jack-demos**, **discdsp-linuxvst-demo**, **pianoteq-demo**, **renoise-demo**, **transcribe-demo**.

End-users who download the AV Linux ISO Image as-provided can to burn it to DVD, copy it to USB media for demonstration purposes as well as install it to Hard Disk on any personal computers that they own and are also further encouraged to customize an installed AV Linux ISO Image and remaster it for their own personal use with the included Remastering tools. Any Remaster of the AV Linux ISO Image with the previously mentioned commercial non-free demo software completely removed is freely redistributable under the GPL.

Disclaimer:

Debian/GNU Linux comes with no guarantee nor does the AV Linux ISO Image. I accept no responsibility for any hardware/software malfunctions, damage or data loss resulting from it's use. It is important to note that the AV Linux ISO Image may also contain Multimedia Codecs that may be under patent in certain countries, it is the users responsibility to know the law as it applies to their own respective country before downloading, evaluating or installing the AV Linux ISO Image.
